

Mohid Chishty

Full Stack Developer

+92 3114459488 | Lahore, Pakistan | mohidchishty6@gmail.com | linkedin.com/in/mohid-chishty-1a1668300

OBJECTIVE

Full Stack Developer with 02 years of experience in development, seeking roles to build scalable, high-performance applications and contribute to impactful engineering teams

EDUCATION

Bachelor of Science in Computer Science

2022 - 2026

Lahore Garrison University

SKILLS

Technical Skills: HTML, CSS, JavaScript, React.js, Bootstrap, MongoDB, MS SQL, Python, Supabase, n8n, AI Automation

Soft Skills: Communication, Team Collaboration, Coordination, Time Management, Problem Solving

EXPERIENCE

AI Automation- apprenticeship

July 2026 - Present

Skill2Success (NASTP)

- Developed automated AI-driven pipelines using n8n, integrating LLM APIs (OpenAI/Gemini) to process, structure, and analyze incoming web forms and document data.

Associate Full Stack Developer

Feb 2026 - May 2026

Nextstac

- Architected and developed a production-ready ERP system using the MERN stack and Electron.js, delivering high-performance web and desktop integrations with scalable frontend and backend architectures.
- Engineered core enterprise features, including role-based access control, GPS-enabled attendance tracking, automated payroll management, and task/project workflow modules.
- Designed modern, responsive SaaS dashboards with secure authentication and employee monitoring controls, optimizing overall usability and system performance for enterprise users.

Full Stack Developer

Jan 2025 - Jan 2026

Ghost Digital and Data Ltd

- Developed and maintained full-stack web applications, building responsive client-side interfaces with React.js and robust server-side APIs with Node.js.
- Authored high-performance, testable, and reusable code to optimize application speed, scalability, and long-term maintainability.
- Collaborated on ongoing projects, delivering new user-facing features, debugging system issues, and scaling existing codebases.

INTERNSHIPS

Frontend Developer Intern

Dec 2025 - Jan 2026

DevelopersHub Corporation

- Worked on the Nexus Platform using React.
- Added scheduling, video call UI, documents, payments, and role-based dashboards.

MERN Stack Developer Intern

July 2025 - Aug 2025

HiSkyTech

- Developed a Private SaaS Freelancing Marketplace using React and MERN technologies.
- Implemented role-based dashboards, job posting, bidding, messaging, and task management UI.
- Added authentication flows, profiles, feedback systems, and complete job workflow screens.

ISPR Summer Internship 2025

July 2025 - Aug 2025

Web Developer Intern

Aug 2024 - Sep 2024

Sui Northern Gas Pipelines Limited (SNGPL)

- Built a medical reimbursement form using HTML, CSS, JavaScript, and SQL.
- Implemented form validation, CRUD operations, and database integration.

PROJECTS

SKILLSELLERS: A Freelancing Marketplace (FYP)

- Built a secure MERN-stack freelancing platform with a freelancer vetting system.
- Integrated real-time messaging, AI chatbot assistant, and role-based dashboards.
- Optimized user trust and reduced transaction fees to 3

AI-Powered Email Replier Agent

- Designed and automated an intelligent email management workflow using n8n, connecting incoming email triggers, custom webhooks, and LLM APIs to draft context-aware response suggestions automatically.

Rent-a-Car Management System

- Developed a MERN-stack system for bookings, authentication, and complaint management.
- Built a responsive React frontend with Express.js and MongoDB backend integration.
- Implemented complete CRUD operations and seamless frontend-backend connectivity.

Terra Alert – Real-Time Disaster Monitoring System

- Developed a disaster alert platform using HTML, CSS, JavaScript, and APIs.
- Implemented location-based live alerts and real-time notification features.
- Designed the system for scalability and efficient data handling.

AI Restaurant Management Chatbot

- Developed and integrated a restaurant chatbot using Botpress.
- Connected the chatbot with a website for automated customer interaction.
